THINK OUTSIDE THE CUP OF TEA

AN INNOVATION COMPANY

WHO THINKS OUT OF THE CUP OF TEA

Our Beginning

The idea was born in Brooklyn, with the desire to innovate and develop functional and healthy products made with the yerba mate leaf.

In 2016 we presented our first Argentine green tea blends with yerba mate leaves at the World Tea Expo in Las Vegas.

We work every day to respect the environment and guide our company towards sustainability.

Mitro Tea

We celebrate the emotion of overcoming

TEA OF *ANOTHER* DIMENSION

NitroTea is a totally sugar-free, additive-free and preservative-free drink that provides an energy booster, a healthy option and *glam* to current drinks on the market, respecting the taste of our original Latitude Blend recipe. A new dimension of the traditional Iced Ted.

COLD INFUSED NITROGEN TEA

Its fine bubbles achieve a sparkling sensation in the mouth, an attractive foam and velvety flavor, the closest thing to a champanoir style but it should be noted that it is alcohol-free. Thanks to its caffeine content, students, athletes and yogis choose it to stay focused.

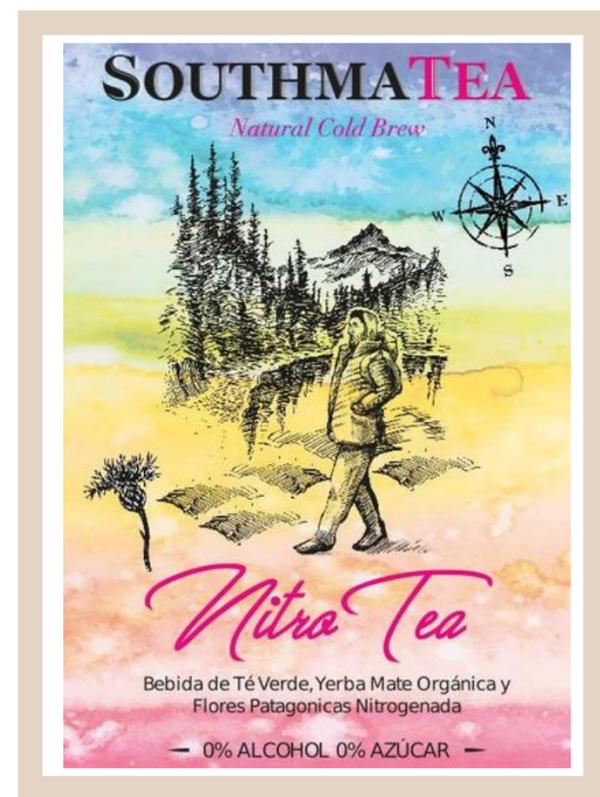

Why Nitra Tea

We celebrate the emotion of overcoming

PALEO + KETO
PLANT BASED
VEGAN

At Southmatea we seek to explore new sensations in the mouth when developing our products. Innovation is a central axis of our company and after doing several tests in the nitrogen-charged study, we saw the potential at hand.

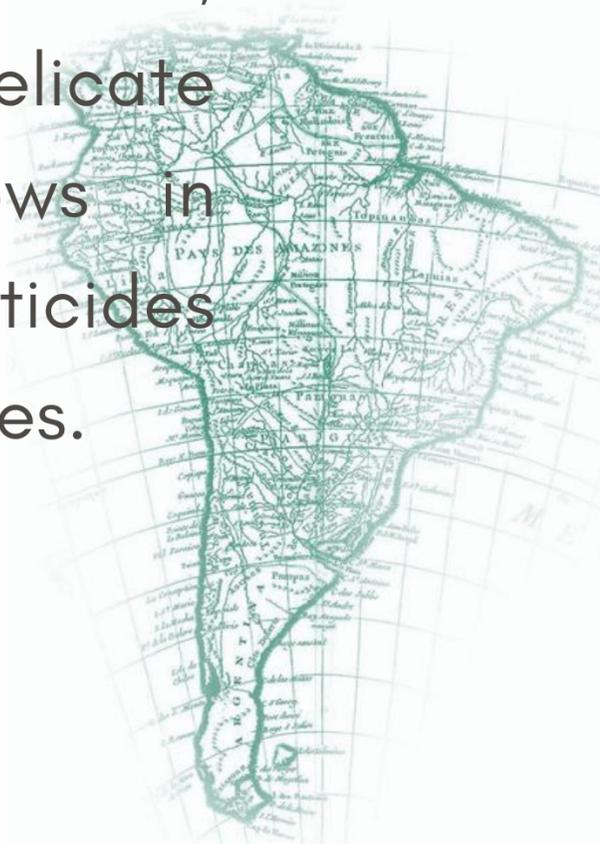

We understood the attributes, benefits and how cool it is to drink a non-alcoholic nitrogen drink, completely free of sugar and sweeteners and with 100% natural energy. 0 calories!

Yerba Mate Leaves

We process the best yerba mate leaves from our Missionary Producers in a special way, free of dust and stick, resulting in a crystalline and delicate Mate. Our Yerba Mate grows in Oberá, Misiones, free of pesticides and has no added or preservatives.

Mate Espresso

Modern solution for a traditional drink

A quick shortcut for healthy mate espresso.

Just one ingredient: biodynamic harvested yerba mate from the Southamerican Rainforest.

PALEO + KETO

Our Mate Matcha

Sudamerican Superfood

Yerba Mate Matcha is a South American superfood that contains antioxidants due to its high concentration of polyphenols. These improve the body's natural defenses and protect it from cellular damage. We use the leaf of the Yerba Mate milled extra fine to culinary grade.

How to use: to prepare breads, cakes, cookies and puddings by mixing the Mate Matcha with the flour. For smoothies or smoothies add half a teaspoon to the preparation. For lemonades or drinks use a quarter of a teaspoon per glass. Also use it as a topping for yogurt
