# ROB1T

# Boost your food delivery performance

Monitor availability, delivery time, reviews, menu stock and pricing of your restaurant locations across all delivery platforms in one place.
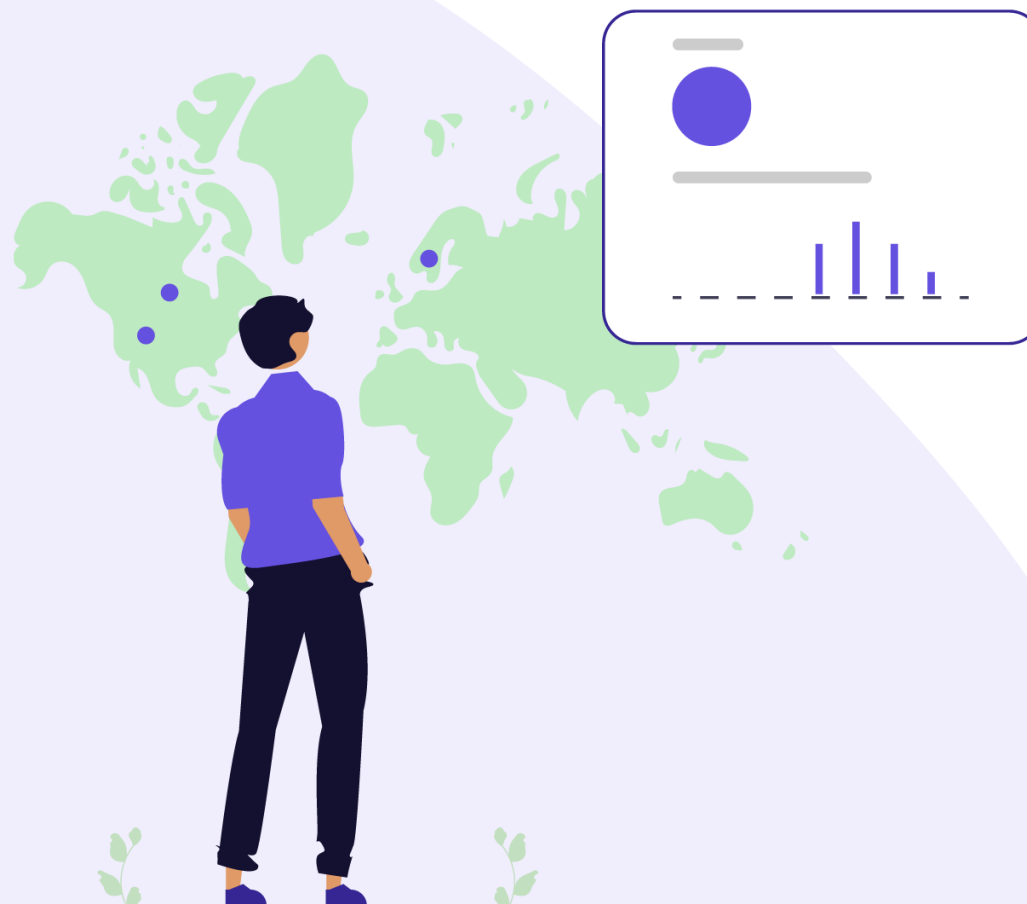

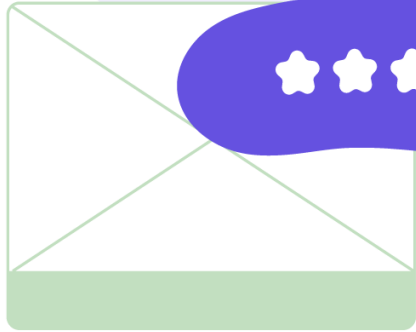

# Availavility & Delivery Time

Tracking time per day each location accepts food delivery orders. Ensure all platforms are open when they should be. Highlighting the locations which are continuously underperforming (more than 45 minutes of delivery time).

# Opening Hours

Are your restaurant locations opening hours correctly aligned across all platforms? Ensuring opening hours are not only correct but also in sync across all the platforms.
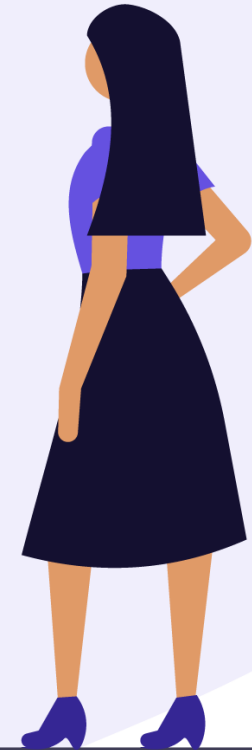

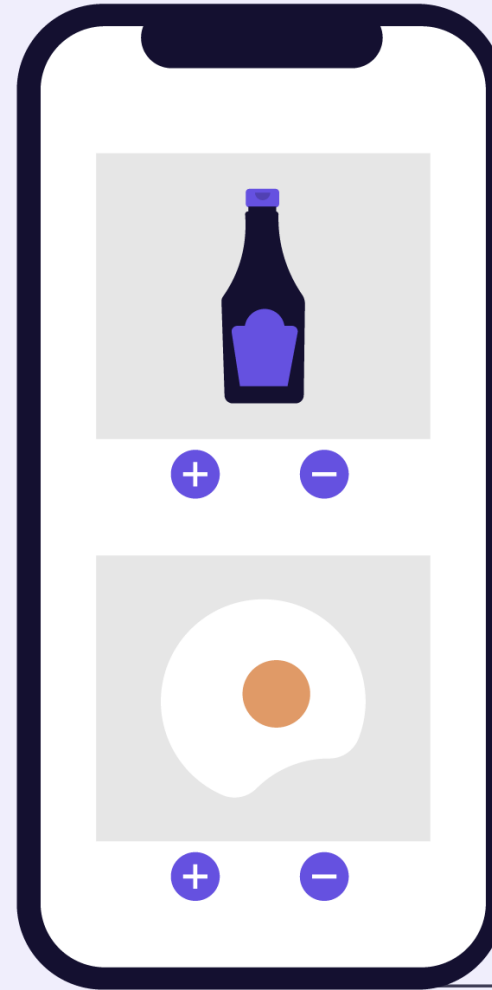

# Reviews & Ratings

Tracking customer satisfaction scores and feedback by each food delivery order. Automate comments analysis through text analytics models with artificial intelligence, specially trained for the industry.

# Menu Items

Flagging pricing and out of stock issues. Identify where menu content is missing or misaligned across aggregators. Track price average evolution per location.

# Why **ROBIT**?

### Real Time

Monitor all your restaurant locations in real time. Track all your metrics every single 20 minutes.

### On Demand Reports

Customizable reports with the ability to "slice and dice" your metrics by restaurant location, food delivery partner, date range, and time of day.
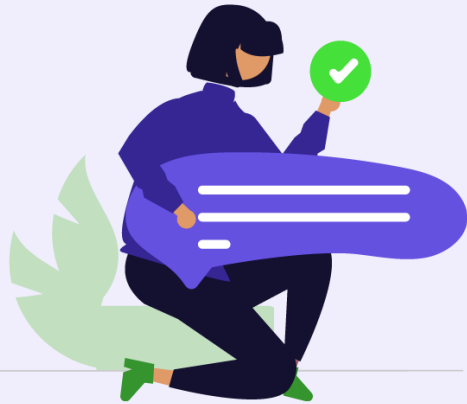

### Alerts

Be alerted every time we detect availability or menu issues on your restaurant location.

### Competitive Analysis

Evaluate your performance metrics against competitors.

# Customers love ROBIT

*"Implementing ROBIT was a very satisfactory experience. We not only work with great team and great people, but also facilitate a tool that provides very valuable information. It allows us to monitor the availability of our stores and work to improve that; this improvement has a direct impact on the sales volume we generate."*
